

## Fourwheels Renting Damage List

update 07/15/2023

The determination and quantification of the extent of the damage was carried out using the following criteria:

- **Bodywork:** damages are quoted and updated on the basis of the “wincar” system, recognized and used by the main insurance companies, based on the manufacturers’ price list;
- **Glass:** damages are quoted and updated based on the car manufacturers’ price lists;
- **Tyres:** damages are quoted and updated based on the manufacturers’ price lists;

All the amounts indicated below include labour, works and ancillary materials necessary for the restoration, as well as waste disposal. They also include the technical downtime, calculated on the basis of the days necessary for restoration (including any spare parts ordering times) multiplied by the standard daily rental rate. The determination of mechanical damage, multiple damages and damage to parts not indicated in this document price list is carried out on a case-by-case basis by the Lessor once the damaged vehicle has been examined and on the basis of the type of damage, also taking into account the costs including labour, works and ancillary materials necessary for the restoration, as well as waste disposal. It also takes into account the technical downtime, calculated on the basis of the days necessary for restoration (including any ordering times) multiplied by the standard daily rental rate.

Bodywork damage is detected by measuring the area affected by the damage with the possible support of a meter. The type of bodywork damage is classified as per the indications and table below. Once the damage has been determined according to the above criteria, Fourwheels Renting has the exclusive right to establish when to carry out the repair. All amounts are net of VAT.

**SCRATCH NOT CHARGEABLE** A single scratch of less than 2 centimeters on the bodywork of the car is defined as not chargeable, with the exception of the following parts: windows, mirrors, headlights, underbody, glass, rims and tyres.

**SLIGHT SCRATCH:** A light scratch is defined as a single scratch longer than 2 centimeters but less than 10 centimeters, or a single scratched area whose extension does not exceed a surface area of 10x5 cm. A single scratch occurring on the following parts of the car: windows, mirrors, headlights, underbody, glass, rims and tyres, even if less than 2 centimeters long, is considered minor and therefore chargeable.

### **SERIOUS SCRATCH**

A serious scratch is defined as a single scratch longer than 10 centimetres, or a single scratched area whose extension exceeds the surface area of 10x5 cm.

### **SLIGHT DENT**

A single dent is defined as light if its extension does not exceed a surface area of 10x5 cm.

### **SERIOUS BRUISE**

A serious dent is defined as a dent, or a set of dents, measuring more than 10x5cm, but falling within a single surface of 40x40cm.

### **REPLACEMENT/BREAKAGE/MISING PART**

This is defined as damage that makes it necessary to replace a part of the vehicle because it is missing, broken or compromised; these are also single or multiple dents exceeding a surface of 40x40 cm.

**GROUPS J-L-I-W-H-T-F SUV**

SCRATCH		DENT		REPLACEMENT/BREAKAGE/ MISSING
SLIGHT	SERIOUS	SLIGHT	SERIOUS
